

# Furnishing the Future with Al

**Excerpts from the Research Report by Praxis Global Alliance at** 

5<sup>th</sup> Dec, 2025

#### **Foreword**

The global furniture and interiors industry stands at the cusp of a technological metamorphosis that is redefining the very foundations of spatial design. As Artificial Intelligence graduates from a novelty to a fundamental driver of the creative economy, and as generative design enters the mainstream manufacturing process, brands and legacy houses must take note. We are witnessing a shift where algorithms are no longer just passive tools for efficiency; they are active co-creators and strategic decision-makers in a hyper-personalized world. From predictive supply chains to ergonomic personalization, the expectations for what our environments can do for us are diverging markedly from those of the past, demanding a fresh lens through which businesses must reimagine their value proposition.

This report explores the rising dominance of AI innovations in shaping the future of furniture—transforming both the genesis of product design and the fluidity of consumer discovery. Seamlessly bridging the gap between artisanal heritage and algorithmic precision, these advancements are challenging legacy notions of mass production. They are ushering in an era where "custommade" is scalable and where the customer journey is augmented by immersive, data-driven visualization.

The new-age demand is not just for utility but for intuitive adaptability, not just for aesthetic appeal but for intelligent living. Consumers are no longer buying static objects; they are investing in dynamic ecosystems that align with their lifestyle and values. In this evolving landscape, stakeholders must recalibrate their approach—moving beyond traditional marketing and merchandising to embrace a holistic strategy that spans generative development, sustainable material optimization, and phygital channel presence.

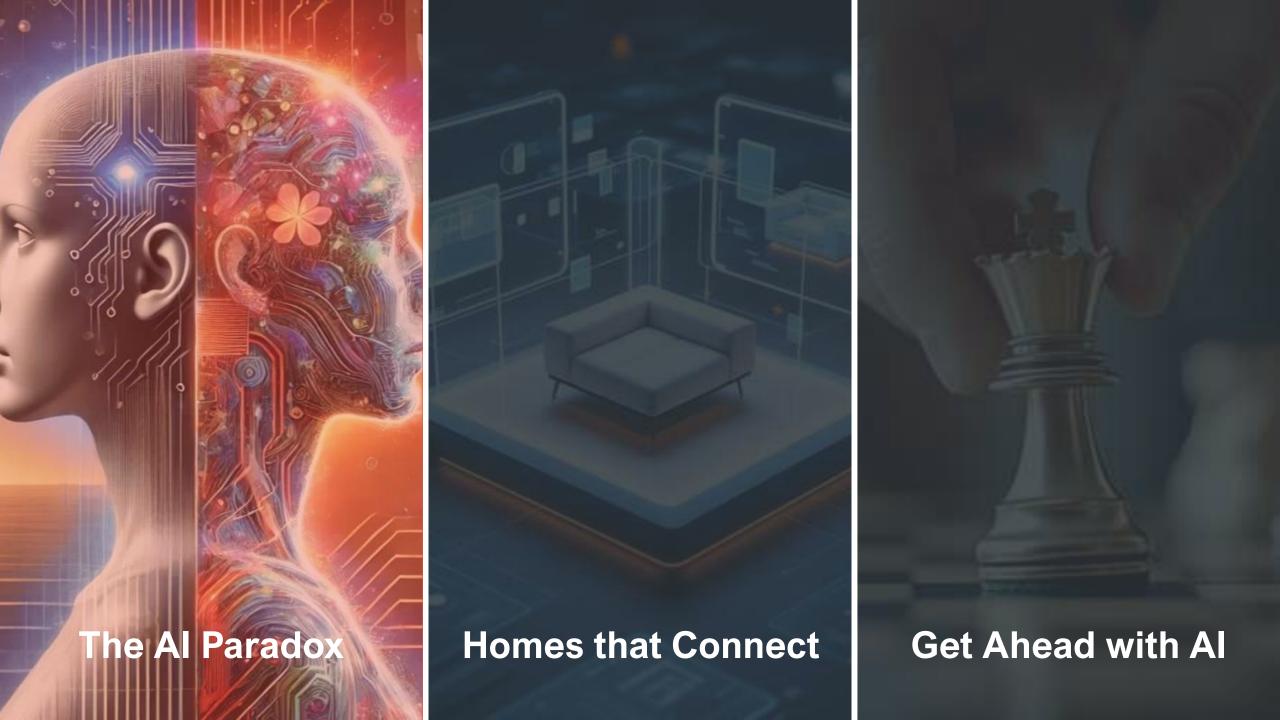

We, at Praxis Global Alliance, hope this report sparks new conversations and transformations across the ecosystem. We look forward to engaging with stakeholders across the industry who are committed to understanding and shaping the future of furniture industry in India

Mahesh M
Chief Executive Officer
Creaticity

#### The Mind vs. The Machine!

#### Powered by food

- 1 Creative
- Instinct and logic-based decisions
- 3 Personalized with context
- 4 Fails but might not learn
- 5 Needs motivation (and naps)
- 6 No privacy concern

#### **Powered by electricity**

Literal 1

- Logic based decisions 2
- Generic due to lack of context 3
- Accelerated learning avoids failures 4
  - Relentless and works 24/7 5

Artificial intelligence

Privacy concerns 6

**Learns from data**

VS

#### Al is a powerhouse with great potential

The Future Forecaster

Amazon anticipates what you will buy based on your search history

The Language Interpreter

Siri understands your spoken requests and responds to them

The AI That Sees

Google Lens identifies objects, plants, and animals from a photo

Artificial intelligence

**Machine learning** 

**Predictive AI** Deep learning

**Generative Al** 

Computer vision

NLP

The Smart Decision Maker
Self-driving cars navigate roads & traffic

The Pattern Recognizer

Netflix suggests shows based on what you watch

**The Advanced Learner** 

Face ID unlocks your phone by analyzing facial features

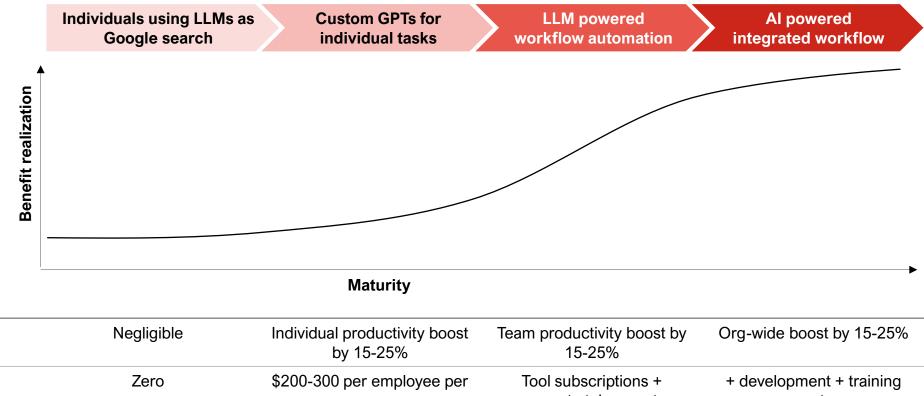

The Content Creator

ChatGPT writes emails, articles, and stories

Source(s): Praxis analysis © Praxis Global Alliance

#### Organizations are at different levels of Al maturity

Benefit realization	Negligible	Individual productivity boost by 15-25%	Team productivity boost by 15-25%	Org-wide boost by 15-25%
Cost incurred	Zero	\$200-300 per employee per annum	Tool subscriptions + compute token costs	+ development + training costs
Scalability of solutions	Zero	Individual task level	Non scalable beyond specific workflow	Infinite scalability via integrated workflows
Complexity of solutions	Zero	Zero	Basic complexity of integrating systems	Max complexity due to enterprise-grade systems

Source(s): Praxis analysis © Praxis Global Alliance

#### Al is powerful and risky. Get it right to win big

### Availability of data

Developing AI projects on dirty, biased data, scanty data

IBM Watson for Oncology recommended incorrect or unsafe treatments due to scanty training data

### Business context

Projects deployed without considering seasonality, change management

Predictive model over estimated prices leading to

\$500M

losses and 25% workforce reduction

### **Unexplored** technology

Adopting untested technologies without understanding limitations lead to errors

reported payment routing failure

US\$ 900M

mistakenly transferred

System failure

Software glitches or misconfigurations can cause critical operational failures

HSBC failed to detect money laundering

US\$ 1.9B

fine levied

#### Management

Inadequate risk management in fully automated systems

\$10M+ sunk costs due to Voice based order management system misinterpreting orders (eg. Ordering 260 McNuggets instead of \$2.60 McNuggets)

#### Overspending

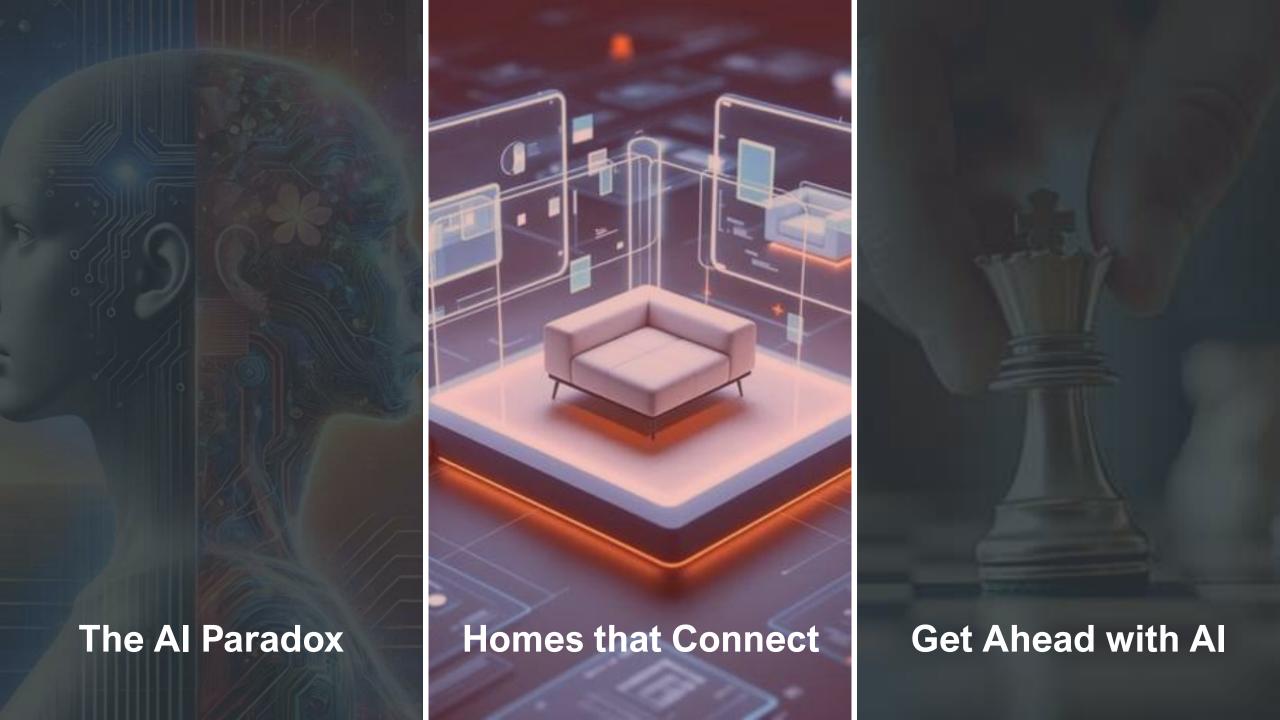

High AI investment without clear ROI can strain resources, causing losses

Goldman Sachs Al spending concerns

with Rol

**US\$ 1T** 

spent without much effectiveness

#### THEN. WHAT. NOW: Five trends shaping the FUTURE

1) Hyper

personalization at scale

2

Digital Twins at frontlines

3

Smart manufacturing

4

Signals, Not Surprises

5

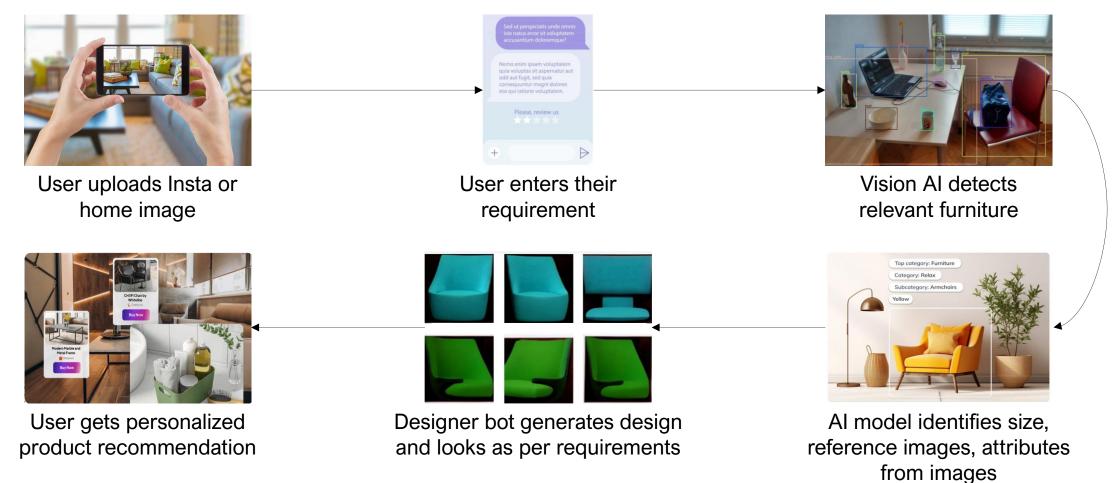

Optimizers, Not managers

#### Hyper personalization at scale: "Infinite Catalog"

#### The biggest competitor is not another brand, but the speed of changing user expectations

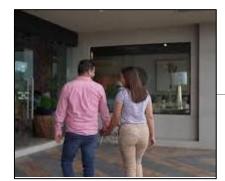

**\*\*wayfair** → model production and imagery pipeline time from **3 months to just 4 weeks** 

#### Digital Twins at frontlines: Retail Design and Sales Assistants

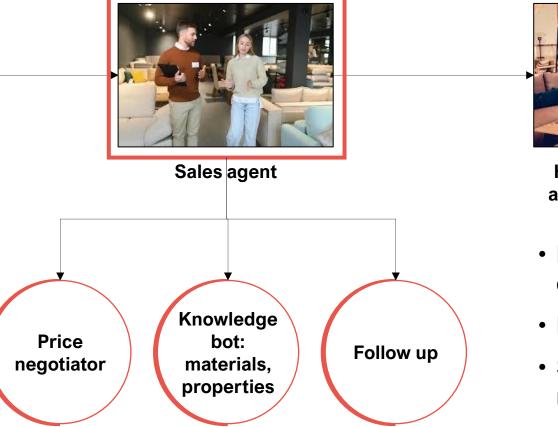

#### Tony Stark without J.A.R.V.I.S. is just a guy in a suit

**Customer visits** retail store

- Instagram image of furniture
- Image of current furniture
- Specific requests like pet friendly, etc.

- Higher conversion rates
- Premium prices
- Strong word-ofmouth

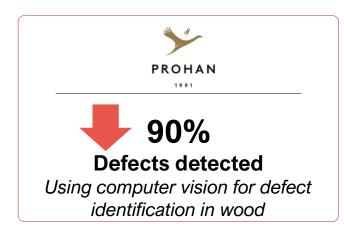

MATHIS HOME → Al Sales Copilot delivers faster cycles, empowering associates to scale bigger

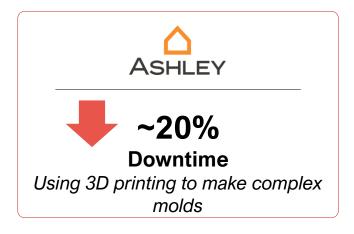

#### Smart manufacturing: Build more, waste less

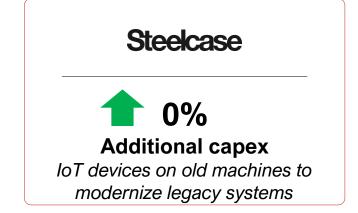

It's not about robots building goods; it's about AI ensuring the machines never stop

Can our factories manufacture a hyper personalized SKU efficiently?

#### Signals, not Surprises. From Firefighting to Foresight

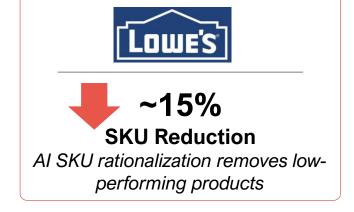

The fanciest use of Al isn't a robot, but an inventory sheet that never has an "Overstock"

Can our supply chain match delivery times for furniture and fashion?

#### Optimizers, not managers: Predict. Position. Profit.

#### Al copilots are nitro boost to your business

#### **FREEDOM**

**NPD** timelines

Al-driven merchandising hub with manual controls

**Basket size** 

Location & AR based in-store mode for enhanced product discovery

First attempt deliveries

Real time satellite data enhanced location verification in routing

In-store conversion

Computer vision based heatmapping for real time associate placement

**Cross selling** 

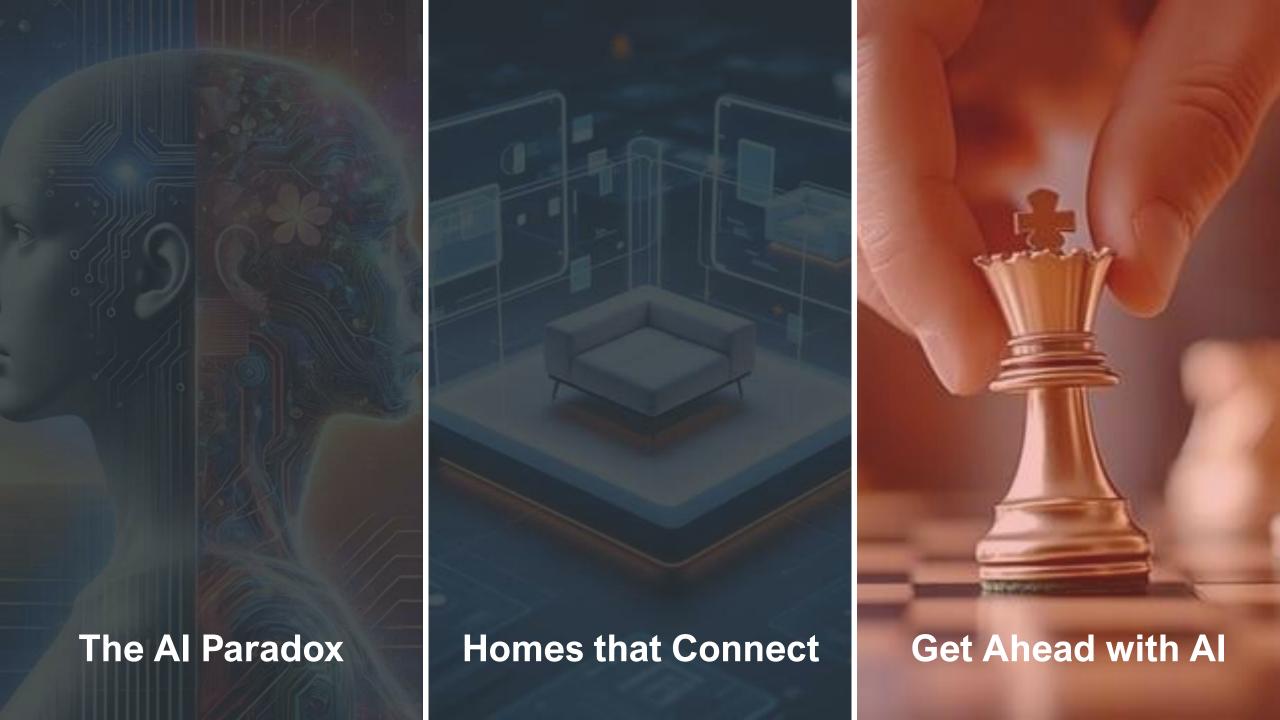

Al bot + human design consultants for support & product reco

#### **Crate&Barrel**

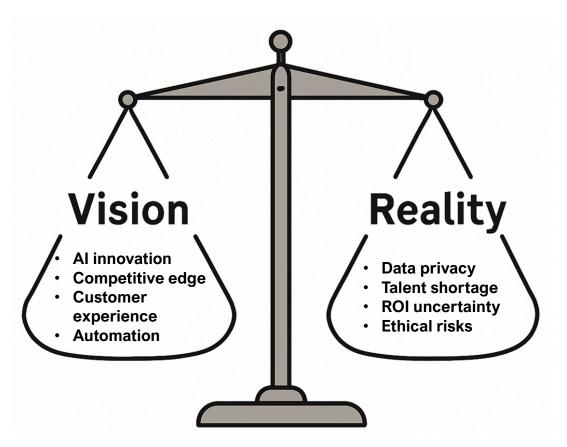

**Dynamic delivery modes** 

Moved to distributed supply chain strategy for higher speed

#### CXOs need a blueprint to steer their organizations in this Al storm

- 1. Where should we begin? Which use case to pick?
- 2. How to measure ROI of AI project?
- 3. Should we build a custom solution or subscribe a SaaS?
- 4. Which technology, which tools to pick?
- 5. When to hire and build internal capability?
- 6. How to ensure relevance of projects when LLMs are evolving so fast?
- 7. How to estimate project completion and value realization timelines?

Al success isn't just about adoption, it's about alignment between ambition, capability, and responsibility

Source(s): Praxis analysis © Praxis Global Alliance |

#### Al adoption is a long and iterative process

Al strategy

Impact analysis

**Build vs buy** 

**Prioritise the** wins

5 Establish data infrastructure

(6)

- Define clear vision aligning Al initiatives with business goals
- Assess Al's potential benefit and risks to transform processes
- Decide whether to develop or partner or purchase
- Focus on projects with quick, visible results
- Build scalable, secure, and Al-ready data infrastructure
- Begin with manageable initiatives, then scale
- Recognize and incentivize Al-driven achievements
- Continuously improve data quality and accessibility to enhance Al outcomes
- **Enable cross-functional teams to lead AI efforts**

(9)stakeholder teams Al adoption Empower the cycle

> 8 Refine data

infrastructure

Achard the crew

#### Success mantra: Start small → Demonstrate success → Repeat

#### Don't buy a Ferrari to deliver Pizza

- ✓ Pick 1 specific pain point
- ✓ Prepare required datasets
- ✓ Solve it & demonstrate success
- ✓ Increase adoption & realize business value
- ✓ Discontinue if not scaling or business value not achieved

- Large scale Al transformation projects
- × Jump on Al before fixing data
- × Pick a large use case
- × Ignore data security

Prohan (Europe) piloted their quality control Al on *one* specific defect type before rolling out to the whole factory

#### **Strong Data Pipelines: The secret to Al success**

>80% of AI projects fail due to data issues. Fix the foundation before building the future.

#### Raw data

Poor data quality

Insufficient data volume

Fragmented / multiple data systems

### Broken data pipelines

#### **Deployment**

Biased datasets

Inaccurate labelling

Lack of governance

IBM Watson oncology → Trained on hypothetical, dirty & unclean data

Zillow → Inadequate representation of seasonality in training data

Source(s): Praxis analysis © Praxis Global Alliance

#### Data security has to be woven in each step of decision making

1

#### **Unauthorized access to data**

- API key / oAuth / tokenized authentication on all integrations
- Role based access control to data and features

2

#### **Data residency**

- All data resides in owned tools & DB
- Firewalls, anti-virus and incident management protocols

3

#### **Data encryption**

- Encryption for sensitive data
- All data transfers through secure HTTPs connections

4

#### 3<sup>rd</sup> Party integrations

- Use of enterprise grade tools with secure connection channels
- Sensitive data anonymized, masked to ensure DPDP compliance

5

#### File sharing

- All data and files remain in secure drive / folder
- Sanitization of data before sharing with external parties

**GrowValue** 

**Deliver superior returns** 

## **Business First Al**

#### Align, Accelerate, Achieve business outcomes with DRIVE™

We work with clients from IDEATION to OUTCOME REALIZATION						
D	R		V	Ε		
Diagnose problem statement	Ratify with stakeholder	Integrate & develop	Validate with pilots	Embed in company culture		
Quantified value	Stakeholders aligned	Solution developed	Solution fit established	Org wide adoption		
<ul> <li>Business output metrics defined</li> <li>Root cause analysis</li> <li>Estimation of business value</li> </ul>	<ul> <li>Stakeholder sign off</li> <li>Direct stakeholder validating business value creation</li> </ul>	<ul> <li>System developed with customer tools, DB, and enterprise grade security</li> </ul>	<ul><li>Validation of business value in 1 use case</li><li>Fine tune solutions based on feedback</li></ul>	<ul><li>User training &amp; change management</li><li>Full realization of business value</li></ul>		

#### Praxis for 'Business First Al': We get things done, practically and fully

# Business outcomes first

# **Unbiased** solutioning

# End-to-end execution

# Quickest to deploy

# **Embed at Scale**

Using AI and tech to enable business outcomes

Unbiased and best-of-breed solutions

Solutioning +
Architecture +
development +
integration +
training

95+ use cases 20+ Al Agents 50+ integrations Training and capability building for sustained value realization

23

# What we do: We strategize and execute Digital / Al enablement journey of organizations

#### Al / Technology Value Realization

## Identify and realize ROI in Al use cases

- Al strategy / roadmap
- Use case prioritization
- Al-first culture: Trainings& immersion sessions

# Process digitization & Al Implementation

# Embed Tech / Al for competitive edge

- Process automation
- Use case implementation
- LLM, Al integration into business workflows

# Tech, Al and Data maturity assessment

### Assess tech, data and infrastructure

- Tech benchmarking & best practices
- Tech Due Diligence
- Data gov & Cybersec

# Data Factory, BI and Reporting

## Prepare for org-wide Al scale-up

- Al ready data ETL and infrastructure
- Single source of truth

#### **Al-powered Enterprise Transformation**

#### Revenue: Turn data into Dollars, powered by Al

- Data driven decision making
- Sales and marketing process enhancement
- Customer experience and churn management

#### **Cost excellence: Leaner, more efficient enterprise**

- Employee productivity enhancement
- Operations cost optimization
- Risk mitigation & compliance
